

# Graph a Line Using X & Y Intercepts

**Sketch the graph of each line.**

1)  $x$ -intercept =  $-1$ ,  $y$ -intercept =  $4$

2)  $x$ -intercept =  $5$ ,  $y$ -intercept =  $-5$

3)  $5x + 2y = 8$

4)  $3x + 2y = 2$

$$5) y = -\frac{9}{4}x - 5$$

$$6) y = -x + 1$$

$$7) 3x + 4y = -12$$

$$8) y = 5x - 4$$
